

Straight Pins and Safety Pins

Success every time.

Quality makes the difference.

Straight pins and safety pins from Prym are well-known branded articles. They are recognized by their top-quality finish, their easy-to-grip handling, by their slender points, which are gentle to all materials, and by their optimal flexibility. The wide range fulfils a great variety of requirements and for each purpose there is the suitable pin.

Brass pins from Prym are absolutely rustproof, also when they are left in the fabric (e.g. curtains) for longer periods of time. Hardened and tempered steel pins have a high flexibility, which is important in sewing and decisive for the high spring resilience of safety pins.

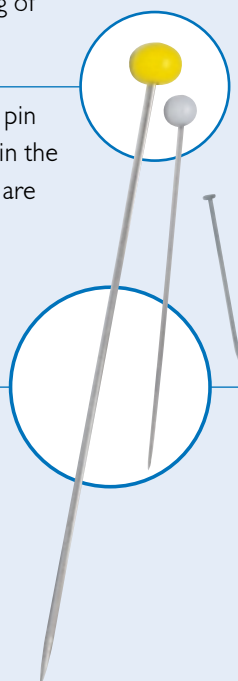

... from head to point

burr-free, smooth and snag-free heads
with an easy-to-grip pressure area

good **working flexibility** for excellent resilience, no bending or breaking of the pins

coloured glass heads make each pin easy to see so that nothing is left in the garment. They withstand ironing, are burr-free and easy to grip

slender, elongated points
allow easy penetration even into tougher material. No damage to the fabric.

... from cap to spring

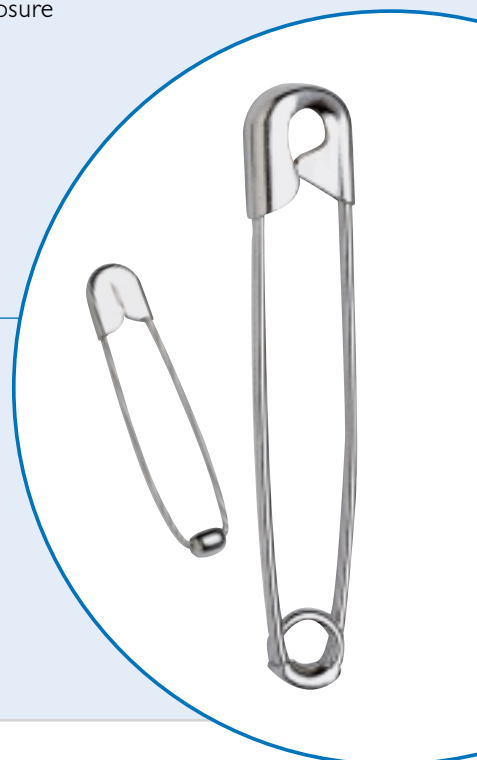

evenly drawn cap with no sharp edges

slender points for easy penetration into the material without damaging it

good spring resilience for easy unpinning but secure closure

a **perfected surface finish**
serves to protect against rust and increases the smoothness of the pin shaft
