

Sewing Machine Needles and Accessories

Quality is convincing – stitch by stitch.

Quality makes the difference – also for sewing machine needles. Perfected geometry and first-class machining of each needle from the Prym assortment always produce a perfect, professional result. The wide range of products allows individual sewing techniques: whether embroideries on fine linen, dressmaking with ultra fine microfibres or the sewing of thick materials e.g. corduroy, denim and sail cloth – with sewing machine needles from Prym every material can be sewn.

The shank:

Flattened shanks guarantee correct insertion of the needle. The dimension of the flattened side is adapted to the corresponding needle gauge, ensuring the ideal spacing between needle and hook and thus faultless looping.

The **clearance above eye (flute)** facilitates looping and ensures alignment between needle and hook.

Vertical groove:

The **vertical groove** allows the thread sufficient space for unhindered movement at the penetration point and ensures faultless thread feed.

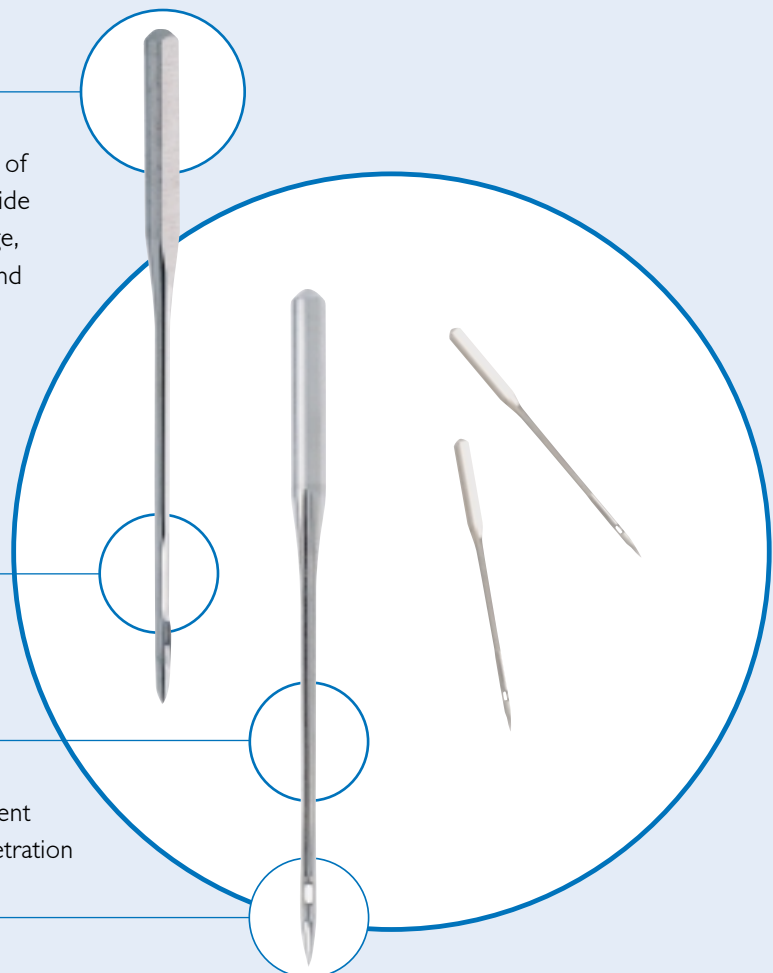

The eye:

Specially polished eyes prevent the thread from breaking, no matter how fast the machine is running.

Exact observance of the DIN dimensions means that the needle point does not strike the needle plate, thus preventing needle breakage.

The point:

The variety of point shapes, needle gauges and eyes provide optimal conditions for working with different materials and sewing threads.

Success every time.

Areas of Application for Sewing Machine Needles from Prym

Needle type	Type	Area of application	Fabrics	Needle gauge	Needle shape
General Purpose	standard	almost all natural and synthetic fabrics	Chiffon, georgette, organdy Batiste/cambric, artificial silk Union linen, corsetry fabrics, poplin, shirts, blouses, dresses Cambric, linen, suits Table linen Coat fabrics	60, 70 70 70, 80 80, 90 90, 100 90, 100
