

Scissors and other Cutting Tools

Success every time.

With quality, you make the best cut.

Utmost care and many decades of know-how are the ingredients used in the production of Prym sewing scissors and tailor's shears. They offer maximum precision and cutting accuracy from the screw joint to the tip – whether cutting jersey, denim, silk or linen. In fact Prym has more than 400 years experience in the technique of cutting.

The **blades** of high-quality stainless steel are assembled and ground in such a way that squeezing or crushing of the cloth is impossible.

The blades are joined by a **screw and thread** which prevent them from working loose, so that even if they are used intensively they are guaranteed to have a **long serviceable life** and cut with the same top quality.

The precise finish right up to the **tips** guarantees excellent cutting results.

The **soft handles** offer outstanding ease of use due to their ergonomically shaped eyes. Fingers therefore have ample space for fatigue-free work without any pressure marks being left behind.

A deep insertion of the **metal ends** into the soft handles provides for balanced **dimensional stability**.

Prym Cutting Mats and Accessories

Description	Size	Presentation	Code No.	Illus.
-------------	------	--------------	----------	--------

Cutting mats for rotary cutters

Essential whenever you use rotary cutters.

They are soft enough to protect the blade and hard enough to prevent deep incisions.

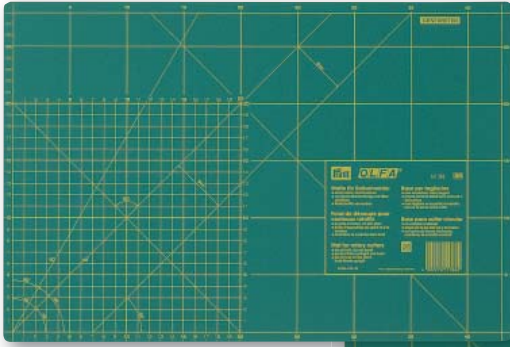

Prym guarantees that the cutting mats are resistant to cracking and splitting when they are used correctly.

front printed with cm scale, back with inch scale	30 x 45 cm/11 x 17"	1 piece	611 386	A
	45 x 60 cm/17 x 23"	1 piece	611 374	B
